

Special HPTC 2009

Omega Peripherals is an engineering company with more than 15 years of experience, specialized in architecting, integrating, deploying and supporting complex Data Storage solutions to Enterprise and Technical Computing clients.

Its efforts in HPTC are aimed to offer specific, scalable and economical data storage systems. As a global integrator we excel in building enterprise class data management solutions while simultaneously lowering the customer cost of accessing and managing their data.

Omega Peripherals completes its data storage solutions with specialized GFS, high performance servers, management tools and data archive products to provide an integral solution on GRID environments.
