PROMOCIONES de UPGRADES

Valid through December 15, 2009

VMware vSphere Enterprise Plus Upgrade

Upgrade to Enterprise Plus at over 50% off!

VMware vSphere Enterprise Plus includes all the new vSphere features including Host Profiles and vNetwork Distributed Switch for transforming datacenters into dramatically simplified cloud computing environments. This upgrade is ideal for existing V3 Enterprise customers that are looking to transform internal IT into a cloud infrastructure. And now, for a limited time, you can upgrade your VMware Infrastructure 3 Enterprise license to vSphere 4 Enterprise Plus for over 50% off the list price.

Enterprise Plus

MSRP: USD \$685 | PROMO PRICE: \$295 | ~~€240~~ | £295

VMware Part #: V54-ENT-ENT-PL-UG-PROMO

Enterprise Plus with Cisco Nexus 1000V

MSRP: USD \$1380 | PROMO PRICE: \$795 | ~~€645~~ | £605

VMware Part #: V54-N1K-UG-C

Valid through December 15, 2009

VMware vSphere Advanced Upgrade

Upgrade to vSphere Advanced at over 50% off!

VMware vSphere Advanced provides a strategic consolidation solution that protects critical business applications against planned and unplanned downtime to provide superior application availability and data protection. This upgrade is ideal for existing V3 Standard customers that are looking to move beyond basic consolidation to virtualizing business critical applications. And now, for a limited time, you can upgrade your VMware Infrastructure 3 Standard license to vSphere Advanced for over 50% off the list price.

MSRP: \$1,595

PROMO PRICE: \$745 | ~~€605~~ | £570

VMware Part #: V54-STD-ADV-UG-PROMO

recuerde que las promociones y los upgrades
tienen fecha de caducidad.**

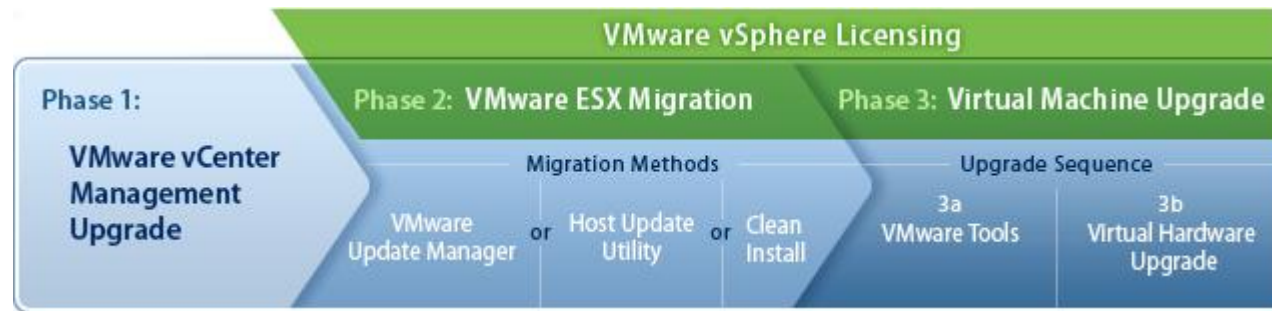

VMware vSphere 4.0

Servicios de Actualización

Antonio Sánchez
D.Técnico Zona Centro

Proceso de Actualización

- **Verificación Requisitos de actualización**
- **Actualización VMware VirtualCenter – Vcenter**
- **vCenter Update Manager: Orchestrated Datacenter Upgrades**
- **Actualización Host**
- **Actualización Máquinas Virtuales**
- **Licenciamiento**

Adopción de Nuevas Funcionalidades

- **Análisis de la infraestructura actual**
- **Procesos de migración para adaptarse a las nuevas funcionalidades.**
 - **Data Recovery**
 - **Host Profiles**
 - **StorageVmotion**
 - **Thin Provisioning**
 - **Distributed Virtual Switch**
 - **Fault Tolerance**
- **Puesta en Marcha de los nuevos servicios.**

Nueva Versión VMware View 3.1

- **Mejoras en el rendimiento**
- **Copia de seguridad para la base de datos de View Composer y LDAP**
- **Mejora en los logs**
- **Mejora en el soporte USB**
- **Soporte para la redirección multimedia (MMR) para Windows Vista.**
- **Reducción del ancho de banda para Adobe Flash.**
- **Multi-Protocol Support**

VMware vSphere 4.0

VAC Services

Antonio Sánchez
D.Técnico Zona Centro

- Complementariamente a sus productos VMware ofrece también un amplio portafolio de servicios paquetizados.
- Estos servicios paquetizados se compran individualmente como un producto o vía PSO credits.
- Estos servicios son realizados por Partners que pertenecen al programa VMware Authorized Consultant, o Partners VAC .

Omega Peripherals es **Partner VAC**

- Nos permite tener acceso a las mismas metodologías de servicios de alta calidad y las mejores prácticas empleadas por los ingenieros de VMware.
- Autorización para ofrecer desde servicios paquetizados por VMware a servicios personalizados para cada cliente.
- Acceso a formación específica para Partners VAC.
- Acceso a herramientas específicas que utilizan los ingenieros consultores de VMware.

¿Qué servicios VAC ofrecemos desde Omega Peripherals?

VMware Virtualization Assessment

Estudio del entorno de servidores físicos del cliente para determinar el potencial ahorro y el impacto de la consolidación. A través de herramientas de capacity planning se toman ratios de utilización de CPU, memoria, I/O, para determinar la arquitectura óptima de **vSphere**.

VMware vSphere Jumpstart

Instalación Standard en casa del cliente de la infraestructura **vSphere**. Configuración basada en "best practices", workshop interactivo con el cliente focalizado en la arquitectura, administración y operativa de **vSphere**.

VMware vSphere Jumpstart with Physical to Virtual Migrations

Formación en la herramienta **VMware vCenter Converter** y migración de algunas maquinas físicas a virtuales.

Trasferencia de conocimientos y entrega de documentación.

Plan and Design for VMware View

Permite a los departamentos de IT estructurar y optimizar la gestión del puesto de trabajo, diseñando arquitecturas de **VMware View** eficientes y conforme con las "best practices."

VMware View Pilot Services

Preparación de un entorno Piloto de **VMware View** en casa del cliente para poder evaluar en un entorno semi-productivo las ventajas de gestionar el puesto de trabajo mediante **VMware View**

¿Qué servicios VAC ofrecemos desde Omega Peripherals?

Plan and Design for VMware Site Recovery Manager

VMware SRM automatiza la ejecución de los planes de disaster recovery del entorno virtual del cliente, reduciendo tiempo y posibles fallos humanos, es necesario un completo estudio de los requerimientos del cliente para un correcto diseño y configuración de SRM

VMware vCenter Site Recovery Manager Jumpstart

Instalación, puesta en marcha , pruebas de concepto y ejecución de un plan de recovery en el cliente, asistido por un ingeniero consultor

VMware Consolidated Backup Jumpstart

VMware Consolidated Backup Jumpstart permite configurar e integrar los procesos de backup/restore del entorno virtual del cliente con la herramienta corporativas de backup de la organización.

VMware vSphere Health Check

Realizar un **chequeo**, con la ayuda de herramientas específicas que recogen datos que luego se analizan y nos permiten identificar potenciales oportunidades de optimizar la configuración y mejorar el rendimiento de una instalación ya existente .

VMware Virtualization Assessment

Overview

A VMware® Virtualization Assessment gives you a clear view of server consolidation opportunities within your existing physical IT infrastructure. We assess your current server landscape to determine your potential costs and savings and better prepare you to roll out VMware vSphere™.

Deliverables

- Up to 30 days of system and performance data for existing Windows® servers in your environment. To collect the data, a consultant installs a VMware Capacity Planner Data Manager at one site (one collector)
- Data analysis for up to 200 existing Windows servers
- Server consolidation and virtualization assessment report, including a preliminary total cost of ownership analysis of the sampled environment, and recommendations

Benefits

- Estimate potential server consolidation cost savings
- Estimate required server hardware and VMware vSphere licenses
- Use VMware Capacity Planner for data collection, scenario creation, and optimization analysis
- Accelerate the assessment process with proven VMware server consolidation experience

Target Audience

Companies planning server consolidation projects who need guidance on sizing requirements and justification of expenditures to facilitate consolidation via virtualization

Key Activities

Action	Responsibility
Kickoff call	All
Data collector installation Gather server inventory and performance data	Consultant
Interview key stakeholders	Consultant
Assessment report creation	Consultant
Presentation of report findings	Consultant
Wrap up session	All

Pricing and Scope

- Up to two (2) days on site
- Assessment Report created and delivered off site
- Analysis conducted on up to 200 Windows servers selected by the customer
- VMware Virtualization Assessment delivered by a VMware Certified Professional (MCP) consultant from VMware or from a VMware Authorized Consulting (VAC) partner
- Contact your local VMware representative for pricing information

Requirements

- Dedicated, networked (including Internet access) Windows 2000 Server SP3 or higher machine with at least 500 MHz CPU, 256MB RAM, and 2GB free disk space
- Local and domain administrator (root) access to existing servers to gather data for use in analysis

VMware vSphere Jumpstart

Overview

The VMware vSphere™ Jumpstart provides you with a proof-of-concept on-site configuration and knowledge transfer using VMware ESX™ and VMware vCenter™.

Deliverables

- Standard on-site installation of up to two ESX hosts and one VMware vCenter Server
- Interactive workshop focusing on architecture, administration and operations
- Best practices and knowledge transfer

Benefits

- Accelerate your virtual machine deployment
- Mitigate risk by leveraging experienced consultants and proven best practices
- Provide a configuration workshop in your environment

Target Audience

Architects and administrators new to VMware ESX and VMware vCenter.

Key Activities

Action	Responsibility
Kickoff call	All
Technical architecture overview	Consultant
Installation and configuration	Consultant
Virtual Machine creation	Consultant
Provisioning and managing	Consultant
Wrap up session	All

Pricing and Scope

- Up to three (3) days on-site
- Maximum of five (5) participants
- Up to two ESX hosts and one VMware vCenter Server
- VMware vSphere jumpstart delivered by a VMware Certified Professional (VCP) consultant from VMware or from a VMware Authorized Consulting (VAC) partner
- One day VMware Consolidated Backup Add on is available for purchase
- Contact your local VMware representative for pricing information

VMware Consolidated Backup Jumpstart Add-on

Overview

The VMware® Consolidated Backup (VCB) Jumpstart Add-on helps you understand business continuity issues with respect to VMware vSphere and explore various strategies to increase availability and shorten response times when faced with service disruptions and disasters.

This one-day consulting engagement is designed to be ordered and delivered with the VMware vSphere™ Jumpstart or the VMware vSphere with Physical-to-Virtual Jumpstart. These jumpstarts, together with the VCB Add-on, speed your time-to-market while maximizing your time and dollars.

Deliverables

- Interactive, proof-of-concept, disaster recovery workshop using VMware vSphere
- Best practices knowledge transfer
- Demonstration of backup and recovery of a virtual machine using VMware Consolidated Backup

Benefits

- Speed time to implementation with an accelerated learning curve and knowledge transfer
- Mitigate risk by leveraging experienced consultants and proven best practices
- Provide proof-of-concept or pilot in your environment

Key Activities

Task	Responsibility
Completion of VMware vSphere Jumpstart or VMware vSphere with P2V Jumpstart	
VCB overview	Consultant
Planning for routine failure	Consultant
Backup and recovery of virtual machines	Consultant
Testing of virtual machines backup/recovery	Consultant
Disaster planning	Consultant
Wrap up session	All

Scope and Pricing

- Up to one (1) day on site engagement
- Maximum of five (5) participants
- Demonstration of backup and recovery of up to two virtual machines using VMware Consolidated Backup
- VMware Consolidated Backup Jumpstart Add-on delivered by a VMware Certified Professional (VCP) consultant from VMware or from a VMware Authorized Consulting (WAC) partner
- Contact your local VMware representative for pricing information

Requirements

- Purchase along with VMware vSphere Jumpstart (CON-FSVC-15) or VMware vSphere Jumpstart with Physical-to-Virtual

VMware vSphere Health Check

Overview

You've made a significant investment to virtualize your computing environment—let an expert help you get the most from your investment. Virtualization touches many aspects of your data center such as servers, networks and storage, and the organizations and processes that control them.

A VMware® Certified Professional consultant will work with your team to understand your unique environment and provide guidance on the current best practices for configuring and managing VMware vSphere™. Working together with your team, the consultant will review your VMware vSphere and provide concrete, actionable recommendations to optimize your virtual infrastructure.

Deliverables

- Conduct assessment of VMware vSphere (up to four ESX™ hosts) using the VMware Health Analyzer virtual appliance to collect inventory, configuration and usage data
- Identify potential opportunities to optimize configuration and improve performance
- Hold an interactive workshop to facilitate knowledge transfer on VMware vSphere best practices

Key Activities

Action	Responsibility
Kickoff call	All
Architecture and operations review	All
Technical audit and analysis	Consultant
Operational analysis including consideration of business objectives	Consultant
On-site wrap up	All
Create assessment report	Consultant
Review final assessment report	All

Pricing and Scope

- Up to two (2) days on-site, and one (1) day off-site to create assessment report
- Health Check includes up to four (4) ESX hosts
- Maximum of five (5) participants for interactive workshop
- Contact your local VMware representative for pricing information
- VMware vSphere Health Check will be delivered by a VMware Certified Professional (VCP) consultant from VMware or from a VMware Authorized Consulting (VAC) partner.
